

How to Construct a Long Board

1. Drill Holes in curved part of Skateboard.
2. You and a helper your cut your skate deck.
3. Clamp your deck to the table
4. Cut with jigsaw. Cut as close as you can to the pattern line. (**Don't Cut The Table**)
5. Go to disc sander and sand down to the pattern line.
6. Use a rasp to file around edges that you couldn't sand with the disc sander.
7. Use portable router to round over the edges on the top and bottom.
8. Use portable hand sander to sand the edges.
9. Get pattern for trucks and tape it to your board in the correct position.
10. Center punch in the middle of each circle.
11. Throw away pattern and drill the holes at the drill press (Delta).
12. Picture Frame must be handed to Kuhn before going on to the next step.
13. Put on Grip Tape
14. Punch out drill holes and use box cutter to make designs in grip tape.
15. After you board has been taken home I will pass out the trucks and wheels.
